

PRESS RELEASE

## SEATTLE TOOL™ TEAMS UP WITH A MAJOR AUTOMOTIVE PAINTING SOLUTION PROVIDER

Missouri and Kansas, USA are full of dedicated automotive enthusiasts who have high standards for every aspect of their driving experience – from the high tech finishes on their cars and trucks to the tools they count on to tune their engines.

That's why **Seattle Tool** and **ColorVision**, the area's premier automotive paint and industrial coatings distributor, are teaming up to introduce **Seattle Tool's** unique line of aviation grade tools and storage solutions to progressive thinking gear-heads in the midwest.

"Our companies are working together because we share the same high standard for customer satisfaction and loyalty," says Paul McLeod of **Seattle Tool**. "We care for and partner with our customers through the entire process to ensure they are more productive, and in turn, more profitable... so it's a great fit. They're going to love our products."

**ColorVision** has been building loyal customers for three decades and have five full service stores in Missouri and Kansas, including their headquarters in Springfield, Mo. The new arrangement adds **ColorVision** to a growing network of **Seattle Tool** distributors.

The Seattle Tool logo is displayed in a stylized, metallic font. The letters are three-dimensional and have a brushed metal texture. The logo is set against a dark, textured background that resembles diamond plate metal. The logo is flanked by two circular bolts on either side.
